

it's good to know...

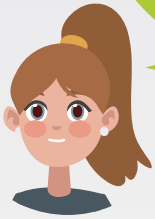

a series of easy to understand topics on Oral Health Professional education

N1

Thinking about studying Dentistry, Dental Hygiene

I am keen to help people
I am interested in healthcare
Good at communicating
Enjoy working with my hands

I think this might be for me...

DID YOU KNOW...

There is no centralised European application system, however European citizens and some other nationalities are allowed to apply directly to other national processes

REMEMBER

Applications in most countries are **highly competitive** and **places are limited**, in most cases **specialists skills are not required** as you will acquire them through study. In some cases there will be **pre-selection** and subjects such as the **sciences maybe preferred**.

Make sure you

- Check national process
- Identify preferred school / university
- Comply with requirements
- Submit application on time
- Are aware of any fees
- Check that the qualification will allow registered professional recognition
